outstanding features are making the MORAINE* LOCUST America's favorite shade tree

Throughout America the Moraine Locust is rapidly becoming a favorite shade tree for Home, Industrial and Park landscaping. Hundreds of thousands are growing vigorously under all climatic conditions providing a light lacy shade under its bright green umbrella. This aristocrat of shade trees owes its popularity to a brilliant horticultural achievement which incorporates every desirable shade tree quality in its rugged structure.

These recognized features of Moraine Locust speak for themselves.

1 Vigorous fast growth

Grows to a height of 25 to 30 ft. in just 10 years, increasing its diameter faster than either the soft maple or Chinese elm.

2 Bright green foliage

Long graceful leaves keep their beautiful bright green color all season long—even in areas where rainfall is light.

3 Graceful shape

Moraine Locust branches arch upward and outward to form a wide spreading vase-shaped tree of great beauty. Its long delicate leaves give the tree a willowy grace, unmatched for ornamental plantings.

4 Storm resistant

The branches of this hardwood tree bend under heavy strain and withstand heavy wind and snow. Breaks or splits are extremely rare.

5 Clean—free of maintenance

No thorns—no unsightly seed pods to clean up. The small leaflets fall in late autumn and sift down into the lawn making it unnecessary to rake them up.

6 Encourages luxuriant lawn growth

Sunlight filters through the light foliage to permit luxuriant growth of lawn grasses underneath the branches of the tree.

7 No surface roots

Moraine Locust roots deep, thus does not rob soil of nourishment required for good lawn grass growth.

8 Grows anywhere

Parent tree is the Honey Locust which produces good growth in any kind of soil in areas of light to moderately heavy rainfall. A long lived tree from New York to Minnesota and from Texas to Ontario.

Moraine Locust—the aristocrat of shade trees.

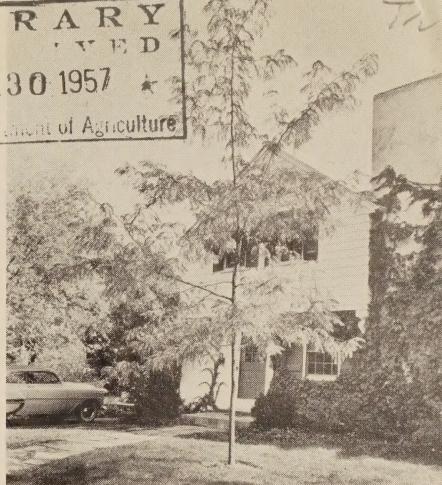

Prices include packing ready for shipment. Check or Money Order should accompany your order for trees.

Asexual reproduction of this plant, without license, is strictly prohibited under the provisions of The Plant Patent Law.
